GOVERNMENT SHOULD BE SIMPLE, FAIR, & FAST.

BLAKE RICHARDSON

MY VISION

A government that uses its power to help people, not constrain them. A town constantly improving through grants. Smart land use, so our new development adds more to the tax base than it costs. Growing the town with the same Main Street style and charm that founded it. A connected community where children can get to school, parks, and recreation safely. All for a Stronger Harrison.

ABOUT ME

A Mullica Hill local, I grew up and lived here for all my life. Growing up, I was a member of the 4-H beekeeping club, was involved with the county fair in town, and attended Clearview.

I graduated from Rowan University with a Bachelor's in Computer Science and a German Minor, now working as a Test Engineer building and testing air traffic control systems. In the past several years, I've developed an interest in local policy, planning, and road safety.

BLAKE RICHARDSON

FOR TOWNSHIP COMMITTEE

WHAT WE CAN DO

Streamline permitting so it's available online, with quick approvals, and denials that include exactly what must change for approval.

Transparency in government with Township Committee meetings available online publicly.

Active communication between the Township Committee and the people on policy goals and progress.

Traditional, smart land use, every extra foot of utilities costs the tax base long term. Main Street was built with this in mind, our new development should be built in this same style, to save all of our tax money, and for a Stronger Harrison.

TOGETHER

Update solar laws, to allow more people to build solar. E.g. legalize both rooftop and ground solar, or building street facing solar without zoning variances.

Bike paths near schools, bus stops, and businesses, for transportation and recreation.

Pedestrian safety upgrades near schools, playgrounds, and high foot traffic areas.

Market Based Parking, so home and business owners can decide how much parking they build.

Legalize In-Law Suites, so those with extra land can build living spaces for family who need it.

UNUSED GRANTS

Multi-Use Paths

- NJDOT Bikeway Grant Program
- DVRPC Regional Trails Program
- NJDOT Transportation Alternatives Set-Aside

Safety Upgrades

- Federal Safe Routes to School Infrastructure Grant
- NJDOT Safe Streets to Transit
